WHY JOIN US?

Innovation is a major challenge for the competitiveness of the economy and competitiveness clusters have been created to support it by building relationships between companies, research centres and academic organizations.

Created from the merger of Elastopôle and Plastipolis, Polymeris is the French competitiveness cluster for rubbers, plastics and composites, an inter-regional cluster with a national vocation and European ambition founded in 2020.

Our service offer

Access to a wide network of companies, research and training centres in the scientific, technical and industrial field.

Privileged access to a range of **high-performance services** (support in setting up a project, collective actions, dissemination of information, networking, participation in missions abroad, etc.).

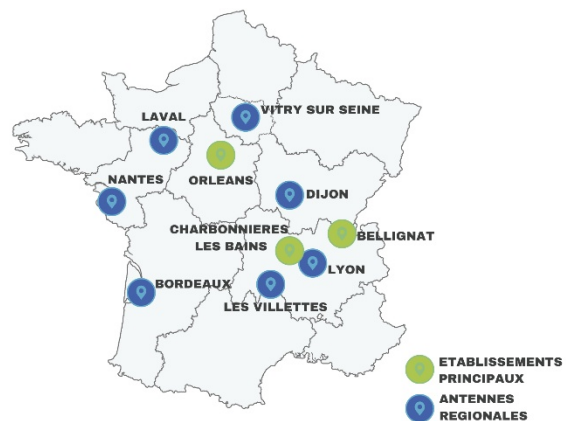

Access to **the cluster's label for R&D projects**, and thus their support from regional and national funding sources and European programmes.

Bringing together the different actors of the elastomer and polymer sector in a perspective of economic and social development of the territory.

Operating on the national territory, a multidisciplinary team of qualified professionals with scientific training is established as close as possible to you and your concerns on the following territories:

- Auvergne-Rhône-Alpes
- Bourgogne-Franche-Comté
- Centre-Val de Loire
- Ile de France
- Nouvelle-Aquitaine
- Pays de la Loire

The competitiveness cluster develops its actions thanks to the financial support of the State and territorial authorities.

Logos of supporting organizations:

- DGE (Direction Générale des Entreprises)
- République Française
- La Région Auvergne-Rhône-Alpes
- Région Bourgogne-Franche-Comté
- Centre-Val de Loire
- Région Nouvelle-Aquitaine
- Région Pays de la Loire
- Grand Orly Seine Bièvre
- Haut Bugey Agglomération
