

PRESS RELEASE – FAKUMA 2021

For more than 50 years, [Collomb](#) is the French mold maker, specialized in mold manufacturing for [thin wall food packaging](#) and [industrial packaging](#) (for grease, paint, hazardous materials, etc.).

Collomb has internationally recognized expertise and exports 90% of its turnover to more than 40 countries.

In 2001, Collomb joined AGP Developpement, a group of 3 French mold makers specialized in multi-material parts, composites and packaging, making it possible to pool purchases, IT department, production resources (laser welding, wire cutting, subcontracting, etc. ...).

Recently, Collomb has been working on important developments such as:

- Extra thin walls, up to 30% weight reduction
- Structural reinforcements up to +15% vertical resistance, +10% stacking capacity
- Handles assembly directly in pail molds (without the need for dedicated automation or manual assembly)
- New temper proof designs

Collomb also offers a wide range of services:

- Product design
- Test center (2 packaging IMM 300T & 580T)
- Parts optimization
- Product qualification according to specifications
- Refurbishment, repair and modification
- Training
